

Withdrawal System

EBW

- Replenish your cash drawer or pay out customers winnings with this smart safe.
- The opening is controlled by an electronic time-delayed blocker that can only be triggered by an authorised user.
- The EBW is controlled by a remote touchscreen that can be installed anywhere.

Easy Banknote Withdrawal

The EBW is ideal for businesses looking to secure banknotes at the checkout. Discreet, this cash system allows you to feed the cash drawer with notes throughout the day, or to pay out large sums of money.

Undeniable advantages

(On Line functionality

When a customer requests his winnings, the amount is confirmed by the cash register software and then transmitted to the EBW. The cash system will then dispense the requested amount.

(Off Line functionality

Thanks to a remote screen, you can request the distribution of banknotes in order to feed the till during a shift with small amounts. This will reduce the volume of cash directly available.

(Security

The EBW is secured by an 8mm thick sheet metal and a 5-point locking door.

(Supervision

A dedicated menu will show you the stock at any time of the day.

(Versatile

Manage every user separately thanks to an authorized login setting accessible through the maintenance menu.

Characteristics

Deposit	Notes
Storage capacity	4 dispensing cassettes of 2 000 notes
Reject	1 cassette
Screen	8" remote touchscreen
Dimensions, mm (H x W x D)	730 x 500 x 612
